

CONRAD WEISER FIELD AND TRACK STADIUM

110,000 square feet

Burkey Construction was the general contractor for the upgrades to the Conrad Weiser High School stadium.

The work included reorganizing and land development of all track and field events as well as football, soccer, and field hockey.

The work included replacing the existing bleachers with new code-compliant stadium bleachers, new press box, new scoreboard and sound system, new eight-lane 400-meter all-weather track, and renovation and expansion of the existing toilet room and concession building.

In addition, a new storage building was constructed adjacent to the concession building.
